**We can source any type of flooring to order including exotic timbers and different hand finishes**

## Our Antique Flooring

This is new flooring made to look old by hand working it. Our prices are very competitive compared to actual reclaimed flooring which is in short supply and extremely expensive.

Our hand crafted antique collection has been designed to replicate the "Old Fashioned" look for Oak flooring. The boards look just like old reclaimed oak flooring. The planks are hand scraped and tumbled to give that natural "worn" look.

The quality of the Oak used and the expertise of our craftsmen mean the solid Oak looks like it has been there for years. These boards will have open knots (but not holes) as did the old floorboards used years ago.

Our engineered hand distressed boards look the same as solid Oak but can be laid in less environmentally friendly conditions where solid boards may move excessively due to climatic conditions. All our boards are tongue and groove all round for easy installation. Our engineered boards range from 150mm, 189mm to 220mm.

You can mix different widths in our engineered boards, and also mix random lengths with our long length boards. This will give the feel of a really old floor at a fraction of the price.

For example mix 150mm wide and 189mm wide engineered boards in both random lengths and also in long lengths, this will be the cheapest option rather than buying all long lengths. Long length boards are more expensive due to the fact that we have to be more selective when choosing the raw material.

We only do widths over 150mm in engineered boards to ensure a trouble free installation and also to ensure that your floor will look good for years to come. The last thing you want is for the floor to move and twist after a year or so.

Please call us to discuss your requirements so that we can meet your expectations.
