We can source any type of flooring to order including exotic timbers and different hand finishes

Why Choose Wood Flooring

The look and feel: Wooden floors add a natural charm to any room. There are endless possibilities in choosing a design to complement your current decor. With our Diamond Aluminium Oxide pre-finished flooring you have a twenty year warranty against wear and tear under normal domestic traffic.

Durability and longevity: Wooden flooring is more durable and lasts longer than ever before with the technology of modern protective finishes. Because of its longevity and durability solid hardwood flooring possibly provides the best value-for-money option compared to other types of flooring.

Temperature and sound regulator: Wood is an insulator, helping to keep heat in when it is cold and the house cool when it is hot. Solid wood is also a fibrous material and it absorbs sound.

Adds value to your home: Solid or Engineered flooring will add value to your home making the installation of a wooden floor a great investment. Installation is quick and easy on any surface. With our specialist knowledge and fitting teams the cost can be less than you think.

Low maintenance: Regular sweeping or vacuuming and the occasional mop (with the appropriate cleaner) is all it takes to maintain its any solid wood floorings lustre, because dirt and dust do not stick to hardwood surfaces.

Safety: Wood will absorb impact better than other floor types because of its natural softness, making it potentially safer for places with children and babies.

Allergies: Hardwood flooring is clean and dust mites and other allergic organisms do not live on such floors making it ideal for the modern environment where so much pollution surrounds us. Hardwood flooring is perfect to combat asthma and n numerous other allergies. It is important to note that all our flooring comes from sustainable managed forests and is a lifelong product of natural beauty and durability.

We can source any type of flooring to order including exotic timbers and different hand finishes

Wooden flooring makes rooms appear larger and lighter with each floor being unique as wood is a natural living material. It is easy to clean with an allergy friendly surface. A good quality solid hardwood floor will increase the value of your property and enrich any interior.

Nothing compares to the luxurious ambiance and warmth of natural hardwood floors. Available in a variety of stunning exotic and domestic species, hardwood flooring combines classic beauty and durability all in a cost effective flooring alternative that does not sacrifice quality.

A sound long term investment increases the value of your home while the natural beauty and warm appearance enhances and compliments all decors and styles. The difference between solid hardwood flooring and laminates, engineered boards etc. is dramatic. No "horrible" sound effects, no chipping or cheap looking finishes. You have to see the difference to believe it.

Get rid of those fitted carpets and all the "bugs" and dust that they create. Live in the modern clean environment with warmth where you could turn any room into a dance floor. Different finishes and colours allow you to chose different woods for different rooms or just keep to the same one for the whole house. Whatever you do the rest of your décor will fit around nature's solution to the best floor in the world.

Aluminium Oxide finish, UV Oil or Natural Oil: The choice is yours and will depend on how much maintenance you want to do. An oiled floor will need proper maintenance very few months, a UV oiled floor less so, but our aluminium oxide floor will need no maintenance expect a Hoover or wipe over with a mop. If you get scratches or marks the floor can be replenished with one of our maintenance kits. We also supply maintenance kits for our oiled floors and it is always better to get the professional kits that we supply rather than an off the self DIY product.
