

Dedicated to People Flow™

STYLISH SOLUTIONS FOR HIGH-FOOTFALL ENTRANCES

KONE revolving doors

KONE revolving doors

Stylish and energy-efficient solutions for smooth, safe building access

KONE revolving door solutions combine high-quality materials, flexible operation, and excellent durability, and are perfect for a wide range of commercial buildings. They deliver smoother people flow by allowing visitors to enter and exit your building simultaneously, and also help cut your energy costs by preventing heating and cooling losses. The clean, simple look blends in with any interior and exterior design and can be customised with a variety of finishes, colors, and lighting options.

Our revolving doors are fully compliant with the EN 16005 safety standard. They incorporate the latest in sensor technology to ensure safe entrance and exit for everyone, including people with luggage or those using wheelchairs. As well as adding a stylish look to your building's entrance area, the glass and steel construction is also durable, easy to clean, and available with class 2 burglary-resistance features as options.

KEY BENEFITS/FEATURES

- Stylish entrance solution for buildings such as offices, hotels, retail centres, airports, and medical facilities
- Cut energy costs by minimising heating and cooling losses
- Customisable to match your building design
- Attractive, energy-efficient LED lighting
- Latest safety technology
- Durable and easy to clean materials
- Optional burglary-resistance features

Which KONE revolving door is the right one for you?

When selecting your entrance solution, you should consider the following:

- Your building type – is it a hotel, office, medical facility, or other type of building?
- The architectural design, colours, and materials used in your building
- The volume of people that will use the entrance – i.e. the footfall rate
- The safety and security options you need, such as collapsible /foldable door leafs or night-lock function

KONE AS YOUR PARTNER

- KONE People Flow® expertise ensures safe and efficient movement of people and goods in buildings
- Automatic building door, lift, and escalator solutions and services from a single provider
- Total life cycle know-how: design, installation, maintenance, and modernisation
- High-quality products that comply with all applicable standards and regulations
- Eco-efficient, modern door solutions for all building types
- World-class preventive maintenance services delivered locally by professional technicians

KONE revolving door 30

This versatile and durable revolving door is an economical way to provide a modern and efficient entrance solution that ensures smooth, safe people flow in buildings such as retail facilities and hotels.

KEY BENEFITS/FEATURES

- Durable and easy-to-clean materials
- Tempered safety glass
- Manual night slide option with class 2 burglary-resistance
- Collapsible/foldable door leaves as an option

KONE revolving door 50

This wide revolving door is the perfect choice for busy environments like airports, medical facilities, and large retail centres and educational facilities, where an efficient, smooth people flow and footfall volume are key requirements.

KEY BENEFITS/FEATURES

- Integrated control system
- Robust design in preventing dirt build-up and weather resistance
- High performance with collapsible door leaves to smooth the goods transit flow as an option

KONE revolving door 100

This premium-quality revolving door is the perfect complement to buildings where visual appearance is as important as performance. Its high-quality glass and steel design is fully customisable for a seamless fit with the modern glass façades that are common in high-end office buildings and prestige hotels.

KEY BENEFITS/FEATURES

- Fully transparent glass panels for a prestige appearance
- Constructed completely with glass with few stainless steel parts to ensure robustness and durability
- Collapsible/foldable door leaves as options for 40 mm profile system
- Drive units located either underneath the door or fixed in the ceiling of the room underneath the door
- Available with two profiles, 25 and 40mm, depending on building environment
