

*Beautiful, easy-fit,*

*maintenance-free wall panels*

*High quality, practical, eco-friendly products that don't compromise design*

Reco Tile 'Union Jack Design'

## About us

Reco Surfaces Ltd. was established 20 years ago as a plastics and recycling company. From that environmental background we have grown to be one of the most innovative wall panelling companies in the U.K. with a factory and offices in Lincolnshire and a Design studio in London. We sell direct through our website and work closely with architects, designers, builders and specifiers to deliver the perfect finish. Our unique patented products and installation system solve the common issues associated with tiles and other wall cladding.

### Surface Solutions

- 4 Different panel types
- Bespoke colour matching
- 200+ designs offered
- Reco Guard™ scratch proofing
- Bespoke design Service
- Bespoke 3D texture moulding
- Made to measure panels
- Installer on-site training
- Nationwide fitting teams

### Environment

- Eco design and materials
- Low carbon footprint in sourcing, manufacturing and delivery
- 20%+ Improved insulation
- Easy clean, no harsh chemicals
- Reduced humidity helps hygiene
- 100% Recyclable = Zero landfill

### Service

We pride ourselves on our customer service and will do whatever it takes to help you deliver your project on time and on budget.

- Dedicated sales person
- Free bespoke design service
- Specification support
- Technical help line
- 24-48h Sample delivery
- 48h delivery of stock items

"We are proud to have Reco on our passport to export program. Their cutting edge products are revolutionising the way the construction industry looks at wall coverings. Helping British export stay great."

Steve Rapley UK Department of Trade and Industry

"We placed our order the panels were dispatched for next day delivery. The whole bathroom was finished in an afternoon."

O knowles, Builder

Welcome to the future of waterproof walls..

# Why choose Reco?

Reco vs Tiles

We all know the problems with tiles:

- They are difficult to fit
- They crack - go mouldy
- They are not eco-friendly
- They can be expensive

Our panels are:

- Easy to install (no wet trades needed)
- No cracking (move with the building)
- No grout = No mould or trapped dirt
- Designed for a lifetime of recycling
- 40%+ More cost effective than tiles

Other benefits

The panels also solve a number of other issues

- Easy to fit DOC M packs etc.
- Simple access panel solutions
- Heat moulding for hygienic corners
- No need for templating splash-backs
- Easy to drill holes for pipework or sockets
- Perfect for bath panels / sink splash-backs
- If necessary simple and fast replacement

Why are we the solution

Our panels have been developed to deliver:

- Minimal wall preparation (no strip out)
- Minimal sundries (just 3 products)
- No specialist fitting equipment or tools
- Easy installation even in tight spaces
- Seamless joins – no T&G or profiles
- Less waste – cut and join like a jigsaw
- Tough, hygienic, easy clean finish
- No grout – No maintenance

The panels deliver the perfect finish and quality for all sectors of the market.

A lifetime of savings

Whatever the size of your project or budget, Reco has a panel to suit you.

- Reduced material costs
- Fast fit - 1/3 of the labour cost
- Reduced property downtime
- Fast clean – long life solution
- 10 year Manufacturers Guarantee
- If necessary simple and fast replacement

# Simple, waterproof fitting system

Reco Tile (shown), Reco Space, Reco Clad and Reco Protect can all be fitted to any reasonably level surface using the below method. You can even fit them over your existing tiles. You only need three products to fit the panels. A combination of the recommended adhesive and sealant plus our patented **Reco-Seal Tape** which acts as a backing seal to the joints between panels and holds them in place while the adhesive cures.

Reco Panel and Reco Tile have specially designed edges that remove the need for

capping profiles or tile trims. Plus the rounded edge of each tile conceals the joins as grout lines.

Reco Space, Reco Clad & Reco Protect can be butted up for a join that looks almost seamless. Reco Tile and Reco Protect can be cut using a sharp Stanley type knife and the other panels with a fine toothed handsaw, track saw or Jigsaw.

Full instructions for all our panels can be downloaded from the website.

[www.recosurfaces.com/tile-panel-installation/](http://www.recosurfaces.com/tile-panel-installation/)

Recommended installation products

1 Check floor and walls are level

2 Prepare wall surface and set out

3 Apply Reco-Tape to joint area

4 Trim panel using a knife or saw (PVC)

5 Apply adhesive to panel

6 Position panel

7 Apply sealant to panel edge

8 Slide second panel up to first

9 Seal top and bottom joints

10 Wipe off excess sealant

11 Admire handy-work

## Reco Tile Panels

People have been fitting tiles since the days of Babylon but they can leak, crack and the grout go mouldy. Isn't it time we found something more reliable? Our easy clean panels are resistant to mould, chemicals, hard-water and staining; leaving you with the perfect stress-free finish.

Made from Acrylic capped ABS or 100% PVC, the panels can be fitted over any reasonably level surface without the need for specialist tools or trades. There is no need for expensive waterproof backing or wall preparation just fit them over existing tiles, straight onto

plasterboard or even breeze-block. As most rooms can be finished in 1 day you will save up to 2/3rds of your labour and about 50% of your sundries cost. Plus no grout means no maintenance after installation.

Choose from a huge range of colours, designs and tile sizes. Plus our bespoke design service can tailor panels to your design theme, image or branding needs.

**Domestic or commercial we have the perfect solution.**

"The level of detail and service was outstanding. Great products, great firm. I wouldn't hesitate to recommend them"

The Scout Association  
Building Surveyor

Reco Tile 'Mosaic, white', Opposite Mosaic White & Grey

“I have to say that I was mightily impressed with the way the Reco Tile both fitted and how it looks on completion. I found it so much easier than ripping ceramic tiles off OR tiling over tiles!”

M. Singleton  
Macclesfield

## Reco Space Panels

Why not try something new in your bathroom or kitchen? Our Reco Space panels enable you to turn drab walls into something exceptional.

Got a design theme you want to continue in waterproof or high wear areas? Want large format feature walls? Want your favourite picture or painting in your bathroom or kitchen? Then Reco Space is the perfect solution. Covert your space with a practical non-scratch, easy clean waterproof solution.

The panels can be fitted over any reasonably level surface. The joins between the panels use our special waterproof system that means there are no profiles or joining strips just **uninterrupted design**.

The easy clean non-scratch Reco Guard™ finish means there will be no more surface marks. Our recommended clear silicone also offers a lifetime mould-free guarantee.

**Enhance your space with Reco Space.**

"I can't thank you enough for your work on the wall panels. They are so fantastic that we just sit and look at them. They have been much admired and a friend will be ordering for his bathroom soon."

E. Forbes  
Horsham, West Sussex

"I needed something hard-wearing and easy to maintain for the bathrooms in our B & B. The Reco Space panels were an obvious choice...the colours are fresh and modern, the panels are excellent quality."

Rachel  
B & B Owner

The ordering & delivery process was efficient and professional, even though we were overseas. After 3 years of installation there is no damage or faults I would not hesitate to recommend the Reco panels and we get fantastic feedback from our skiing clients who visit the chalet.

Richard Lambert  
Gourmet Ski

## Reco Clad Panels

The future of waterproof walls has arrived. Say goodbye to failing and mouldy grout and replace it with a 21st century solution; designed for life.

These high gloss Acrylic or PVC panels look just like coloured glass but without the cost. They can be fitted using the standard profile-free Reco system which gives you the perfect uninterrupted finish.

The gloss capping protects the panels from scratching / wear & tear. Plus the gloss finish is resistant to hard water meaning your panels will keep their perfect just-fitted finish for years.

Just rinse them down after you leave the shower and clean occasionally with a mild detergent. In the kitchen there is no need for scrubbing oil out of your grout, just wipe clean from time to time with an eco-friendly degreaser.

Plus, our bespoke cutting service can tailor make the panels to fit your kitchen or bathroom.

**No more templating (like glass) or risk of breakage just beautiful panels delivered direct in days not weeks.**

“We were looking for an alternative to tiles and grouting as grout discolours and water can get behind if not maintained. We were very happy when we discovered Reco. Very happy with the finished waterproof walls in the showers. They look fab!”

# Reco Protect Panels

Wallpaper has been part of British culture for centuries but it is not without its problems. The delicate paper is easily damaged by sharp objects or water. Also, once marked the paper can't be cleaned or easily repaired.

Reco has found the solution. Our Reco Protect sheets are only 1mm thick which means they are very flexible and can be fitted onto any reasonably level sub-surface.

As the panels are thin they can be cold formed (bent) around internal or external corners by folding sharply around a metal edge. This means even small delicate areas like sockets and windows can be easily

fitted around without the need for specialist equipment. You can also cut them with a sharp knife or fine tooth saw without the risk of tearing.

The lightweight rollable panels also have our patented Reco Guard™ non-scratch / anti-graffiti finish which will protect them from daily wear.

It is also waterproof making it perfect for fitting in areas where you want your walls **PROTECT'ed**.

Gold Leaf design.

"Looks great; would definitely use it again - in fact I'm gutted I didn't do the whole bathroom."

C. Read  
Clapham

The memory of design.

"We fitted them on a uneven walled old farmhouse which should have been challenging but Reco was loads faster than tiling and they look great. Thank you."

Rachel  
Sutton on Sea

# How we can help

You send us your plans or brief

Our designers prepare a design plan

Our tech team prepare an estimate

We deliver you your design & estimate

We put the panels into production

We send our trainer to your site

Or we connect you with installers

Who can even thermo-form corners

We see you through to completion

## Accessories

Adhesive, Silicone & Reco Seal Tape

Our adhesive is high grab and our silicone comes with a lifetime guarantee. Combine them with our Reco Seal tape and you have a reliable waterproof joint that is guaranteed for 10 Years

Backing Strips

Backing strips can be fitted to internal and external corners behind the panels to create a right angle, give extra waterproofing and avoid scribing. Plus they ensure external edges meet neatly.

Edging Strips

Our tile panels have a rounded edge so most of the time there is no need for edging trims. For the other panels if you have a window reveal or boxing in to cover then you can use our edge strip.

Wonderful waterproof walls
